

REINHARD JACOB

Lead Scientist | Formulation Development

+91 7550265505 | Bangalore, India | jacobreinhard7@gmail.com | <https://www.linkedin.com/in/reinhardjacob>

Motivated **Formulation Development professional** with a proven track record in process development, process characterization, and technology transfer for Biologics. Leverage strong scientific knowledge and laboratory expertise to deliver successful projects consistently. Adept at documentation, presentations, and scientific/technical writing, ensuring clear and concise communication. Committed to cGMP compliance and fostering an inclusive work environment.

AREA OF EXPERTISE

- Formulation design
- Process development
- Technology transfer
- Lyophilization development
- Process optimization
- Monoclonal antibodies
- Process characterization
- Data analytics
- CRO/CDMO support

PROFESSIONAL EXPERIENCE

Lead-Scientist DP Formulation development | 7M | July 2025 – Present

Syngene International, Bangalore, India

- ❖ Involved in formulation and product development for large molecules and biosimilars.
- ❖ Executed technology transfer to GMP manufacturing sites and supported drug product manufacturing at GMP fill–finish facilities.
- ❖ Well-versed in phase-appropriate GMP quality systems (early and late phase) with a solid understanding of clinical study drug product supply requirements.
- ❖ Experienced in managing multiple client projects, ensuring operational excellence and timely deliverables.
- ❖ Accountable for preparing and managing GMP batch manufacturing documents including MFR, MPR, BMR, and BPR
- ❖ Effectively handled and co-ordinated tasks required for implementing change-management and supported investigatory studies related to deviation.

Research Associate Formulation and Drug Product Development | 3Y 11M | August 2021 – June 2025

Dr. Reddy's Laboratories, Hyderabad, India

- Led end-to-end process optimization for parenteral drug product development from pre-formulation to process development studies and aligning with regulatory standards for US and EU for injectables
- Experienced in utilizing analytical techniques for characterization and similarity assessment such as: (1) HPLC 2) Sub-Visible Particle Analysis (MFI & HIAC) 3) Moisture content (Karl Fisher and FT-NIR) 4) Physical property analysis using pH/conductivity meter, osmometer, density meter, Nephelometer, viscometer, concentration measurement with SoloVPE 5) PFS Filling & stoppering machine 6) DLS
- Transferred lab processes (liquid & lyophilized) to GMP manufacturing, coordinating with cross-functional teams, including quality and production and supported critical scale-up batches.
- Supported preparation of scientific responses to regulatory queries for several biosimilars (including monoclonal antibodies and fusion proteins), contributing to compliance with global standards and aiding in regulatory approvals..
- Led the maintenance, installation, and qualification of lab equipment, ensuring 100% uptime and streamlining change management processes, which cut down equipment downtime.
- Knowledge of DOE and data analysis using JMP and in-house DOE software.
- Executed transport validation studies and cleaning verification studies.

PATENT

- ❖ Secured a patent '**A Pharmaceutical formulation of Immune checkpoint Inhibitors**' - WO/2023/031970 contributing to developing innovative treatment options and enhancing the company's IP portfolio.

EDUCATION

- Master's in Applied Microbiology | CGPA - 8.5
Vellore Institute of Technology, Vellore (2019-2021)
- Bachelors in Microbiology | CGPA - 8.5
Nehru College, Coimbatore (2016-19)
